

Three ways to put your customer service agent to work.

One build, yours to keep. Pick the scope that fits Wellspring Clinic and the SightSage store today, then tap any tier to see exactly what's inside.

Prepared by Mike Shields and Jordan Kwan
for Dr. Weidong Yu · Wellspring Clinic & SightSage

Every tier is a **one-time build**. No monthly fees, no platform lock-in. You own the assistant and the data.

STARTER

The MVP. Answers questions and books.

\$2,500 one-time

🕒 Build time: 2 weeks

WHAT'S INCLUDED

- ✓ **Connects to your existing website** (Wellspring and SightSage), no rebuild needed
- ✓ Answers questions about the **SightSage products** listed on the site
- ✓ Answers **booking questions** about consultations
- ✓ **Books appointments on the spot:** patients pick a time without leaving the page
- ✓ **Admin workspace:** view your bookings, read every prospective client's intake form, and set your availability, all in one place

TECHNICAL STACK

- › **Embeddable JavaScript widget:** we add the chat helper to your websites in one step, with no rebuild
- › **RAG knowledge base:** we load in all your products, treatments, prices, and answers, so it always replies with your real info, never a guess
- › **Claude model routing (Haiku and Sonnet):** a fast AI for easy questions and a smart one for hard ones, and it never gives medical advice
- › **Calendly Scheduling API:** people pick an open time and book right in the chat, into your calendar
- › **Next.js admin dashboard:** one simple page to see bookings, read patient forms, and set the times you are free

Best for: a fast MVP that answers product and booking questions, then books on the spot.

★ RECOMMENDED

GROWTH

The complete setup. The one to choose.

\$5,000 one-time

🕒 Build time: 3 weeks

WHAT'S INCLUDED

- ✓ **Everything in Starter**, plus:
- ✓ **Clean website revamp:** both sites rebuilt and optimized for booking, then the agent wired into the new site
- ✓ **1-hour follow-up** after every booking or order: confirms, asks for feedback, captures a rating
- ✓ **Turns SightSage questions into orders:** **first-order discount codes** and back-in-stock alerts
- ✓ **Full checkout inside the chat:** cart, upsells, and payment **without leaving the chat**
- ✓ **Integrated learning loop:** it gets smarter with every conversation and rating
- ✓ **Captures, qualifies, and routes** every inquiry by need and urgency
- ✓ **Daily summary**, sorted by urgency

TECHNICAL STACK

- › **Next.js, React and Tailwind website rebuild:** we rebuild both sites so they look clean, load fast, and rank higher on Google
- › **Shopify Storefront API:** customers see your real products, with photos and prices, right in the chat
- › **Shopify Cart API to Shop Pay:** they add items to a cart and check out safely, all in one smooth flow
- › **Calendly and Shopify webhooks:** one hour after any booking or order, it sends a friendly check-in and asks for a rating
- › **Capture-and-route engine (Claude):** it sends every message to the right person, sorted by new or returning, how urgent, and clinic or store
- › **Learning-loop pipeline:** you rate or fix its answers, and it gets smarter over time

Best for: almost everyone. If you're not sure which tier, choose this one.

POWERHOUSE

Fully wired, fully managed.

\$7,500 one-time

🕒 Build time: 4 weeks

WHAT'S INCLUDED

- ✓ **Everything in Growth**, plus:
- ✓ **Integrates with all your platforms:** Instagram, WhatsApp, Facebook, and more
- ✓ **90-day done-for-you optimization:** we run, tune, and update it for you, so you touch nothing
- ✓ **Writes into your patient records:** every booking and intake detail is saved straight into your existing patient system, with no manual entry
- ✓ **Conversion analytics:** consults booked and SightSage orders, measured on your real numbers

TECHNICAL STACK

- › **Meta Graph API:** one helper answers messages and comments on Instagram, Facebook, and WhatsApp, so you stop checking three places
- › **WhatsApp Business Platform, Instagram Messaging API, and Facebook Messenger Platform:** people can reach you on any of the three and get the same fast answers
- › **Meta webhooks and Send API:** it answers right away, and if someone comments on a post it can send them a private message with product or booking info
- › **Meta business verification and app review:** we handle all the official approvals with Meta, so your accounts stay safe and follow the rules
- › **Patient-records write-back (for example Jane App):** bookings and patient info save straight into your system, with no typing it twice
- › **PostHog analytics dashboard:** shows how many bookings and orders the helper brought in, on your real numbers
- › **Deeper AI linking:** it connects your store and clinic info to answer bigger, multi-part questions

Best for: the complete, hands-off system for clinic and store, with the numbers to prove it.

EVERY TIER INCLUDES

Custom-built for your practice

PIPA + PIPEDA compliant

You own the data & the build

No monthly fees

No platform lock-in

A few quick answers

Why no monthly?

You pay once and own it outright. No recurring software bill stacking up. The assistant is yours.

Will it give medical advice?

No. It answers logistics, product, and booking questions, and never diagnoses. Anything clinical is routed to Dr. Yu's team.

Pick a starting point.

Tell us which tier fits where Wellspring and SightSage are today, and we'll map the exact build on a short call.

Reply whenever you've had a look and we'll make it easy to grab a time.
